Claims 1-7 as originally filed are allowable.

The following is an examiner's statement of reasons for allowance: the prior art does not disclose or make obvious a lockable key having in combination a handle connected to a flange on one side and a first spring on an opposite side coiled around a shaft extending between the flange and two lateral appendages and, a second spring internal to the shaft which acts to push two balls outwardly through apertures in the shaft. Individually, the prior art discloses the first concept of a spring between a flange and two appendages (for example David, Pat. No. US 6,267,543) and, also discloses the second concept of a spring which acts to push two balls through apertures (for example Chapman, Pat. No. US 3,097,559). However, there is no motivation for the combination to the two concepts at least because such a combination would require major structural modifications resulting in the destruction of the original intent of the concept.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Flemming Saether whose telephone number is 571-272-7071. The examiner can normally be reached on Monday through Friday.
